

Spring Security

Beginner to Guru

Assignment - Add Custom BCrypt Encoder

Assignment - Add Custom BCrypt Encoder

- You be the developer
- Security and compliance has determined the strength of 10 is no longer sufficient
- Recommendation is to use strength of 15 to prevent brute force attacks
- Update Spring Security to use BCrypt with strength of 15
 - Use new key - bcrypt15
 - Update password for user scott only - others will be migrated at a future date
